SUMMARY

I'm Srinivaas, a full-stack developer and the founder of Batore, a software solutions studio in Coimbatore, Tamil Nadu. I work end to end. I talk to the business owner, model the data, build the product, and run the servers it lives on. Most mature product: Perfect Study Space, used by around 2,000 students across multiple branches. Currently building Bites by Batore and moving the studio onto self-hosted infrastructure, alongside an Integrated M.Tech in CS/IT at VIT.

EXPERIENCE

Founder & Full-Stack Developer — Batore, Coimbatore, India Present

- Built Perfect Study Space end to end: a multi-branch platform used by ~2,000 students, with ~90 backend actions over 25+ tables.
- Delivered Harmony Living (resident management, 72-unit community) and a lead management system for Alpenglow Global (travel).
- Building Bites by Batore, a hyperlocal discovery app on FastAPI, PostGIS, pgvector, Redis and React Native.
- Migrating studio projects from managed Supabase to a hardened self-hosted VPS stack (PostgreSQL 16, Docker, MinIO, Caddy, Cloudflare Tunnel).
- Built BatoreCode, a self-hosted AI coding environment with multi-provider failover, and a 31-agent Claude Code workflow.

Engineer · Four-person team — Cue Court Coffee, Coimbatore, India Shipped

- Debugged revenue reporting in production.
- Ran a full production-readiness review before launch.

SELECTED PROJECTS

Perfect Study Space — Multi-branch management platform · Founder · sole developer. A management platform used by around 2,000 students across multiple branches. Memberships, food passes, attendance, WhatsApp integration, cashback and referral analytics in one system.

Harmony Living — Resident management system · Founder · sole developer. A resident management system for a 72-unit apartment community, built end to end from schema to production.

Alpenglow Global — Lead management system · Founder · sole developer. A lead management system for Alpenglow Global, a travel agency: capturing enquiries and keeping every follow-up in one place.

Cue Court Coffee — Sports facility booking app · Engineer · four-person team. A sports facility booking app shipped by a four-person team. I handled production debugging of revenue reporting and a full production-readiness review.

CURRENTLY BUILDING

Bites by Batore (in development). A hyperlocal daily discovery app for Coimbatore. Strict no-scraping policy: every extracted place goes through human review before anyone sees it. FastAPI, PostGIS, pgvector, Redis, React Native.

Self-hosted Batore stack (migration in progress). Moving every Batore project off managed Supabase onto a hardened VPS: one PostgreSQL 16 cluster with per-project schemas, containerised APIs, object storage and zero open inbound ports. PostgreSQL 16, Node/Express, Docker, MinIO, Caddy, Cloudflare Tunnel.

BatoreCode (internal tooling). A self-hosted AI coding environment with multi-provider failover, so the studio's engineering never stalls on one model vendor. Self-hosted, Multi-provider LLMs, Failover routing.

Agent OS (experimental). A 31-agent Claude Code "operating system" that gives every Batore project the same build, review and ship workflow. Claude Code, 31 agents, Build · Review · Ship.

SKILLS

Languages	TypeScript, JavaScript, Python, SQL
Frontend & mobile	React, Next.js, React Native
Backend	Node.js / Express, FastAPI, REST APIs, WhatsApp integration
Data	PostgreSQL 16, PostGIS, pgvector, Redis, Schema design
Infrastructure	Docker, Linux VPS, Caddy, MinIO, Cloudflare Tunnel, Server hardening
AI engineering	Claude Code agents, Multi-provider LLM failover, Vector search

EDUCATION

Integrated M.Tech, Computer Science / Information Technology — Vellore Institute of Technology (VIT)	In progress
